K9 Kraving has been an absolute godsend! My dog wouldn't touch kibble, even balked at canned foods of any protein source. Once her first bowl of K9 Kraving hit the floor she inhaled it! Within three days her skin cleared up, her eyes were clearer, she had more energy, and is finally excited for food! With multiple protein sources I can mix it up and keep my dog interested. Being a puree means it is also easy to add berries (and other things) for an extra punch of antioxidants. It is also more affordable than a lot of other options because they focus on quality and not marketing. The customer service is excellent and very transparent. No dog should go without food this high a quality, you can never go wrong!
